Price.

SOMETHING NEW

We have developed a new and surprising perfection in Double Glass-Coated Soil Pipe and Fittings—that shows for itself at a glance and speaks for itself wherever shown.

We are enthusiastic about it.

We are anxious to demonstrate to your entire satisfaction its vast superiority over anything of the kind thus far introduced.

The "VITROGLAZ" brand of Soil Pipe and Fittings is GLASS-COATED INSIDE AND OUT.

Thereby insuring absolute and positive protection against SEWER GAS and ELECTRICITY, ACIDS and CORROSION.

It is based upon a special process of enameling which is PERMANENT and will not crack or peel.

This Pipe can be cut with Chisel and Hammer without splitting or chipping the Enamel.

It represents more of quality and value than has been previously thought necessary and is good for a lifetime of satisfactory service.

There is nothing in sight that begins to compare with "VITROGLAZ" Soil Pipe and Fittings for every possible requirement.

We give the most definite assurance that words can convey that it "will make good" wherever used, and that it is fully in keeping with our reputation for doing things precisely right.

The Standard Socal Company Ild
